TO: Greg Blackman
Baggett-Griffith & Blackman

FROM: Joe Garlitz
City of Elgin, Administrator/Recorder

REGARDING: Hunaha Park

Greg, we are in the process of drafting a grant application for the development of Hunaha Park as an overnight RV and day park. The land belongs to the City. The site was filled and leveled around 1974.

The grant project we are proposing is to: a) do an environmental assessment, b) do soils study and other necessary preliminary studies, c) identify the necessary permits required before construction, and d) develop a complete engineering design of the park. We are not proposing to do any construction as part of this grant, but as an end product, we want to have every thing required to be able to let a bid for the project.

For the grant application we need a good estimate of the cost of doing a land survey of property. I would appreciate any help you can give us in getting good cost estimates for the survey. Thank you.

Enclosed: Tax lot maps showing the location of the lot.
